SUMMARY

Product leader with 9 years across FinTech and eCommerce, now building AI-first products hands-on with LLMs — from 0-to-1 discovery and prototyping to omni-channel platforms at scale. Pairs deep fintech and pharmacy-eCommerce domain knowledge with working command of the modern AI stack: LLMs, RAG, agents, prompt engineering, and evals.

SKILLS

AI / ML Product: LLM application design, prompt engineering, RAG, fine-tuning vs. SLM tradeoffs, agent frameworks (LangChain, LlamaIndex, CrewAI, n8n), evals, ML lifecycle, recommendation & personalization, RPA

Product: 0-to-1 product, roadmapping, discovery & requirements, user stories, agile / scrum, backlog management, A/B experimentation, UX collaboration, GTM

Data & Tools: SQL, Python, Claude API, Figma AI, JIRA, Algolia, CleverTap, Google Analytics, Razorpay, AWS, Postman, Confluence

Domain: Mutual funds & RTA, Loan-Against-Securities, payments, pharmacy eCommerce, omni-channel retail

EXPERIENCE

Independent AI Product Builder · Self-directed · Bengaluru — Jun 2026 – Present

- **Building the Personal Finance Analyzer**, an LLM-powered tool (Claude API) that parses bank statements into spending insights; own product strategy, prompt and eval design for messy real-world financial data, freemium GTM, and a build-in-public content loop. Stack: Next.js, Supabase, Vercel.
- **Built Jalsa**, a pass-the-phone party mobile app; packaging for Play Store and App Store submission via Capacitor.
- Deepened AI/ML skills through shipping — LLM foundations, RAG vs. fine-tuning vs. SLM tradeoffs, and agent frameworks — applied directly to product builds rather than breadth-first study.

Deputy Vice President — New Product Development & Innovation · KFin Technologies · Hyderabad — May 2025 – Jun 2026

- Owned a new-product and innovation charter for the domestic MF business — scanning emerging tech (GenAI, ONDC, CDP) and driving discovery-to-prototype on new platform bets; directed a 2-person team.
- Initiated and led early development of a Cash Management System for AMCs and PMS in partnership with Axis MF — ran requirements discovery with their COO and ops team, built the interactive prototype in Figma AI, and kicked off the build; scoped to serve mutual funds and PMS across India.
- Directed development of an AI/LLM-based compliance tool that parses regulatory circulars and auto-generates remediation tasks for system and SOP updates across teams, reducing manual compliance tracking.
- Led build-vs-buy evaluation of omnichannel CRM/CDP and AI contact-centre platforms (Salesforce, UNFYD) — automated call transcription, resolution suggestions, agent-assist, and issue classification/routing — including data-residency assessment.

Senior Product Manager (E-commerce Head) · Emami Frank Ross · Kolkata — Mar 2021 – Dec 2024

- Launched a dark-store fulfilment model (25K+ SKUs, 1100+ pincodes) on top of 100+ retail stores; owned strategy, feasibility, and WMS/3PL integration for rapid, cost-efficient omni-channel delivery.
- Built an omni-channel platform integrating POS with OMS for real-time inventory, improving order fulfilment from 70% to 94% and enabling 91% on-time deliveries.
- Shipped a personalized product recommendation engine and payment-mode optimization — lifting add-to-cart 4%, increasing AOV 35%, and cutting cancellations 27%.
- Built the behavioral analytics foundation (CleverTap, Google Analytics) for experimentation and data-driven prioritization; led end-to-end mobile app development and optimized API performance 50%.

Manager — Digital Transformation & Investor Products · KFin Technologies · Hyderabad — Apr 2018 – Feb 2021

- Owned an ML-powered document-extraction pipeline (cheque and data capture) with RPA to automate reconciliation and credit identification across bank accounts — improving accuracy and turnaround while cutting manual errors.
- Led development and GTM of a B2B API product (Loan-Against-Securities) serving banks and fintech platforms across 200M+ folios; drove integration, feedback loops, and product-market fit.
- Built investor-portal products consolidating onboarding and portfolio views across 26 AMCs into one app; integrated identity and account validation for 1M+ daily transactions to speed investor onboarding.

Software Engineer · Samsung R&D Institute · Noida — Jul 2014 – May 2016

- Built browser and page-preloading features for Smart TV (Tizen), cutting rendering time 50%; automated sanity testing to save 40+ hours/month.

EDUCATION & CERTIFICATIONS

MBA — Indian Institute of Management Bangalore (IIM-B) — 2018

B.Tech, Computer Science & Engineering — Indian Institute of Technology Delhi (IIT-D) — 2014

Certifications: Machine Learning Foundations for Product Managers · Managing Machine Learning Projects — Duke University
